

# ENERGY EFFICIENT CHILLER

WE HAVE MANY OPPORTUNITIES FOR SAVINGS

There have been numerous changes in system design over the last 20 years to increase the energy efficiency of our chiller systems...

- High Energy Efficiency Ratio Semi-Hermetic Compressors
- Variable Unloading Option For Compressors
- Microprocessor Control System
- Horizon Circuited Air Cooled Condensers
- Segmented Evaporator Circuitry
- Variable Speed Drives Incorporated into System

Let us help...We have worked with many public utilities to help our customers discover incentives for their projects, both new and retrofit.
